THE TRIAL OF POOLE.

Dublin, November 13.—In the trial of Poole for the murder of Terry, the defense called no witnesses. Webb, counsel for Poole, contended the charges were founded on the mere surmises. Suspicious acts only were proved.

After argument, the case was given to the jury. After consultation of an hour, the jury announced they could not agree. The jury was discharged, and the case will be retried Monday.

Dr. Webb made an able argument in defense of Poole. He maintained the government had wholly failed to prove its case. He admitted that Poole was a member of the Fenians, but belonged

to no sympathy with assassins. He had, moreover, incurred their enmity. Kennedy was shot by mistake for Poole.

Herschell, closing for the prosecution, ridiculed the theory of the defense as wild and incredible. Justice Murphy, in summing up, expressed the opinion that Kennedy was not murdered by mistake. In fact, Poole told Jamie how Kennedy was killed, and that "the daggers used in the murder were no good; they might as well have been chisels." This was borne out by the appearance of the wounds. It was evident the murderer was deeply planned, and he asked the jury, even if they put the evidence of Jamie aside, if they had any doubt that Kennedy was the person intended to be murdered, to find a verdict against defendant. During the delivery of the justice's charge, Poole jumped up and accused the justice of acting the part of a prosecutor.

MANITOBA.

PROVINCIAL TELEGRAPHIES.

Winnipeg, November 13.—Reports sent concerning the anti-confederation or anti-Canadian movement in Manitoba have few facts for their foundation, as a strong feeling of hostility exists throughout the country to the monopoly provision of the Canadian Pacific railway charter. Since the farmers have commenced to market their grain, they are largely persuaded that the transportation rates charged are excessive, and that the railway favors one large milling firm in various ways. This, added to the increase in duty on agricultural implements, is bringing further expressions from the farmers, and they propose holding meetings at various points to discuss the question and prepare remonstrances for parliament at its next session. Anti-confederationist is a misnomer, and was applied by a local paper to a literary organization of young lawyers in Winnipeg, because they undertook to discuss the grievances of the province. The land reserves made by the Canadian government have also aroused strong hostility. Thus far, however, there is really no deep-seated anti-Canadian sentiment, but a strong feeling exists for more intimate commercial relations with the United States, and Canada must redress the grievances mentioned or trouble may ensue.
